BOOTWEAR

Made for the everyday.

Brand guidelines & approved source book

A practical source of truth for shoe copy, claims, visuals, and human review.

VERSION 1.0 / 05 NOVEMBER 2026

Fictional hackathon material. Bootwear, its catalogue, prices, policies, and source records in this document are invented for a controlled demonstration. They are approved inputs within this demo, not verified real-world facts.

BW-01 / How to use this source

Audit the draft against these written rules. Use only relevant passages and cite the PDF page and passage. Missing evidence means clarification is needed; it does not prove a claim false. A passing AI score never replaces a human approval.

Voice, words & purpose

Bootwear is a fictional everyday shoe brand. Its purpose is to make daily footwear choices feel simple, practical, and welcoming.

BW-02 / Voice and tone

Use clear, warm, grounded language. Explain the product without shaming a wearer, exaggerating performance, or implying medical benefits. Prefer short sentences and helpful descriptions over pressure and hype.

TONE: dirt cheap => fairly priced

BW-03 / Approved terminology

Use the product and category names consistently. The name is Bootwear; the product is Bootwear Everyday. The term replacements below are language rules, not permission to invent a new product benefit.

TERM: kicks => shoes

TERM: shoe addicts => shoe enthusiasts

BW-04 / Positioning and messaging

Bootwear Everyday is for everyday walking. Do not position it as racing equipment. Other brands may be mentioned fairly; this policy does not ban third-party names. Comparisons still need evidence.

MESSAGING: performance racing shoes => everyday walking shoes

The demo factsheet

These are the only catalogue and service statements approved for this fictional demo. Do not extend them into broader guarantees.

BW-05 / Product and price

Source record: fictional Bootwear product sheet, BW-CATALOG-01, version 1.0. All prices use INR; do not invent a discount or another currency.

FACT: Bootwear Everyday is an everyday walking shoe.

FACT: Bootwear Everyday costs INR 2,499.

BW-06 / Materials, sizes and colours

Source record: fictional product sheet BW-CATALOG-01. A rubber outsole does not establish waterproof construction. Textile does not establish recycled content or a sustainability certification.

FACT: Bootwear Everyday has a textile upper and a rubber outsole.

FACT: Bootwear Everyday comes in sizes UK 6 to UK 11.

FACT: Bootwear Everyday comes in Slate, Sand, and Forest.

BW-07 / Returns

Source record: fictional service policy BW-RETURNS-01. Preserve both the unworn condition and the delivery-based window. Do not claim a 30-day return period, free returns, or guaranteed delivery dates.

FACT: Bootwear accepts unworn shoes within 14 days of delivery.

Claims need evidence

Do not turn a missing source into a fabricated replacement claim. Ask for clarification or remove the unsupported assertion while preserving the creator's purpose.

BW-08 / Waterproof and medical claims

No supplied test establishes that Bootwear Everyday is waterproof, 100% waterproof, orthopaedic, pain-relieving, or a cure for foot pain. A comfort-oriented tone is not medical evidence. Request a relevant test or approved clinical evidence before making these claims. Do not replace a cure claim with another unverified health benefit.

BW-09 / Rankings and comparisons

No supplied evidence establishes number 1, #1, best in the world, fastest, or superior-to-every-competitor rankings. Request the measurement, market, study source, and timeframe. Do not assume a comparison is prohibited merely because it names another brand.

BW-10 / Environmental and absolute promises

No recycled-material percentage, carbon-neutral certification, lifetime durability, or zero-defect guarantee is supplied. The catalogue's material description does not establish those claims. Claims such as 100% sustainable or lasts forever need appropriate supporting evidence.

BW-11 / Correct facts without changing meaning

If a draft gives a price or return window different from this source, explain the discrepancy and cite the factsheet. A suggested correction must retain material conditions. Do not turn 'unworn shoes within 14 days of delivery' into an unconditional refund promise.

Visuals & accessibility

Apply these rules to creative assets. Text-only extraction cannot establish the original PDF layout, image contrast, logo positioning, or accessibility of a finished design.

BW-12 / Brand palette and wordmark

Use the BOOTWEAR wordmark without stretching or rotating it. Allow clear space at least the height of its B. Use Forest Ink for core text, Stone for light backgrounds, Sage for supporting surfaces, and Clay for accents. Product photographs may contain natural colours outside the palette.

PALETTE: #142D27, #F3EFE7, #DCE6D5, #C66B46

BW-13 / Legibility and meaning

Keep text readable at its intended display size. Review text/background contrast and avoid placing key copy on busy photographs. Do not use colour alone to communicate a warning, size availability, or approval.

BW-14 / Image descriptions

Give meaningful product images descriptive alternative text. Example: 'Bootwear Everyday shoe in Forest, side view.' Do not put unverified claims into alt text. Mark purely decorative graphics as decorative.

BW-15 / Human publishing gate

Creators may draft and revise. Managers review ordinary copy. Legal or authorised reviewers decide high-risk factual, health, or promotional claims. Record the comment and decision on the specific revision. A score of 100 does not authorise publication.

Judge walkthrough

This page is an evaluation exercise, not additional approved brand evidence. Deliberately incorrect draft wording is identified below.

BW-16 / Step 1 - load the source

Open the Bootwear demo in BrandGuard, download this PDF, and use the bundled source or import it as a Manager or Legal reviewer. The app extracts page-labelled passages and retrieves relevant ones for each draft.

BW-17 / Step 2 - audit this deliberately incorrect draft

Bootwear Everyday is the #1 performance racing shoe. These kicks are 100% waterproof and cure foot pain. Buy them for INR 1,999 with returns on worn shoes for 30 days.

BW-18 / Expected review questions

Check the product positioning and terminology against page 2; the price and conditional return policy against page 3; and the ranking, waterproof, and medical promises against page 4. Findings should cite retrieved PDF passages. Ask for missing evidence instead of manufacturing a replacement fact.

BW-19 / Step 3 - test this source-consistent revision

Bootwear Everyday is an everyday walking shoe. Bootwear Everyday costs INR 2,499. Bootwear accepts unworn shoes within 14 days of delivery.

BW-20 / Step 4 - review the evidence and decision

Compare the retrieved passages and actual findings. Save a revision and re-audit it, then obtain the required human review. Download the audit report to inspect the saved source excerpts and review trail. Source-consistent wording is not independent verification of this fictional brand.
